

SUNRIVER NATURE CENTER & OBSERVATORY presents:

# The 2023 'Christmas Bird Count'

## Wednesday December 20th

This 24-hour National Audubon birding event is a citizen science activity where we count as many of the birds as we can find in a local fifteen-mile diameter circle.

**Everyone is welcome to join!**

No experience necessary. All levels and physical abilities can participate.

**We are looking for volunteers to help us count and compile the data.**

Beginners are paired with experienced birders and everyone is given a specific part of the count circle to cover.

Volunteers can take advantage of our **Bird Count Kid's Day from 9 am to 1 pm**. This special day camp will be full of fun bird-based activities for kids age 6 and up.
